

Amendments to the Specification

The abstract of the disclosure is objected to because it allegedly exceeds 150 words in length as required by MPEP §608.01(b).

Please replace the present abstract of the disclosure with the following paragraph:

“The invention relates to methods for the manufacture of a container containing liquid, the method comprising a) forming a front wall with a cavity in the form of a vessel with an opening connecting the vessel with the front wall front surface, b) introducing liquid into the vessel cavity, and c) attaching and adhering a flat or single-curved rear wall film to a vessel cavity open part to enclose the liquid in the container.”
